The Autodesk Exchange products include Autodesk Exchange Architect (AXA), Autodesk Exchange Civil (AEC), Autodesk Exchange Construction (AEC), Autodesk Exchange Mechanical (AEM), Autodesk Exchange Plumbing (AEP), Autodesk Exchange Landscape (AXL), Autodesk Exchange Electrical (AEE), Autodesk Exchange Landscape Engineering (AEL), Autodesk Exchange Fabric (AXF), Autodesk Exchange Planning (AXP) and Autodesk Exchange Surveying (AXS). Autodesk Exchange Products are available on the Autodesk Exchange website. In addition, the AutoCAD platform includes an extended API which permits the creation of third-party tools using Visual LISP and Visual Basic for Applications. Application programming interface (API) AutoCAD includes APIs that can be used by application developers to make AutoCAD apps. These APIs can be used to integrate AutoCAD with other applications or to add AutoCAD features to third-party applications. For example, three key AutoCAD APIs are AutoCAD Print, AutoCAD Network and AutoCAD Web Services. Net.AutoCAD Net.AutoCAD includes a Java class library that enables Java developers to incorporate AutoCAD functionality into their own applications. This is useful for developers that want to create cross-platform applications. Visual LISP Visual LISP is a scripting language based on the Lotus development environment. Visual LISP includes a compiler for its user-defined functions. Visual LISP developers can use the open-source Visual LISP compiler to generate C++ code for AutoCAD, or can use the Visual LISP compiler to generate Visual LISP code to run on the Microsoft Windows operating system or Unix. Visual LISP requires an additional license from Autodesk. A full Visual LISP reference manual, including a thorough tutorial for developers who are new to Visual LISP, is available from Autodesk at [VBA AutoCAD VBA](#) includes a programming language based on the Microsoft Visual Basic programming language. ## What's New in the AutoCAD?

Refine Markup: Continue drawing in the midst of refining your design. When you're working on a version of a drawing, it's common to need to make last-minute tweaks and changes. Now, AutoCAD 2023's Refine Markup feature lets you continue drawing on the current version of the drawing—perfect for when you need to make changes, but are still reviewing a design. (video: 1:40 min.) Support for the 2D Sketcher: Now, you can work with the 2D Sketcher pen, which features support for the new CUBE tool and extensions that let you easily track and create complex 2D drawing shapes. When you're ready to export your drawing to a new version of AutoCAD, you can take advantage of the Sketcher's linear and angular guides to align your drawing objects and create perfect and solid surfaces. (video: 1:35 min.) Enhanced 2D Mesh Tools: You can now use the 2D Mesh tools to add and edit 2D objects, such as meshes, in your drawings. With mesh support in AutoCAD 2023, you can now work with more accurate meshes and trim them with new snapping and editing features. Experimental 2D Ribbon: We're also excited to announce the experimental 2D Ribbon, which lets you access all of the 2D ribbon commands directly from the command line. Try it out in AutoCAD 2023 today. Refining Your 2D Symbols: Because the 2D ribbon's controls aren't intuitive enough for many users, we're giving you more control over the 2D ribbon by letting you set symbols in custom text boxes. The new Symbols window lets you create custom, drag-and-drop symbol templates and assign them to a text box. (video: 1:45 min.) Enhanced 2D Line Capabilities: We've enhanced AutoCAD's 2D Line cap tool so that you can add your own slope increments and easily switch between flat, beveled, and hollow line caps. (video: 1:15 min.) Support for the 2D Pen and 2D Ruler: The 2D pen and 2D ruler now support the new CUBE tool and extensions that let you add complex shapes
