Gameplay lore ELDEN RING game: Gameplay style ELDEN RING game: Highlights ELDEN RING game: In-game Item interactions ELDEN RING game: Many joys awaited me when I first started to play the game. I eagerly drew a diagram of the main character's paths. However, my expectations have been shattered. Excluding the game's modes, which have been adjusted to simplify the gear item interaction, the fighting is the same, but the selection rate has decreased significantly. Also, a new special attack has been added. This new special attack can be used for a limited time, and each use of the move causes a separate additional attack to activate. When switching back to it, you can input the attack parameters. However, this special attack has a limitation. It can only be used once and 3 to 5 times depending on the weapon's level. The damage output of this new special attack is terrible, and the difficulty for the fight is high. It is also difficult to acquire. Players have told me that they did not purchase this new special attack, which is normally purchased for 2,000 silver by the high level weapons in the game. People have told me that it is difficult to play with this new special attack. This means that the player does not want to participate in the game. I paid 2,000 silver to level the weapons I possess. However, I do not like the weapon parameters, and the weapons do not have good quality on average. I have considered how to deal with the issue of the new special attack. The problem is that it has been installed at the minimum level, and the player is having difficulty playing. However, after leveling the weapons, the balance and balance of the character has been restored. However, the problem of the low selection rate of the equipment item interaction remains. You can only equip 4 to 6 items per equipment slot. Equipment can be adjusted, but if you remove all items from the slot, the problems remain. I will be compensated for equipping the equipment slots. If I have 10 or 11 slots, there will be two items available. Furthermore, due to the aggravation, I will withdraw my purchase request for the new special attack. There is no scope for improvements in the game. I will go back to my old game. The company responded to my
